

FAMILIARIZE YOURSELF WITH PHISHING ATTACKS HR TEAM!

PHISHING 101

Think Before You Click!

WHAT IS PHISHING?

Phishing is when someone tries to trick you into revealing personal information like your password, credit card numbers, or social security number.

Phishing can happen through emails, text messages, or other online platforms.

Think of an email or message you received that asked for personal information. What made it suspicious?

TYPES OF PHISHING

Phishing attacks come in different forms

EMAIL PHISHING

Scammers send fake emails pretending to be a trustworthy organization

SMS PHISHING

Scammers send text messages with fake links or requests for personal information

SOCIAL MEDIA PHISHING

Scammers create fake profiles or posts to trick you into clicking on links or sharing personal information

RED FLAGS

Red flags in phishing attempts are warning signs or indicators that help individuals identify potential scams. Some common red flags in phishing include:

- 1 Urgent or threatening language
- 2 Suspicious sender information
- 3 Requests for personal information
- 4 Misspellings or grammatical errors
- 5 Suspicious links or attachments
- 6 Generic greetings
- 7 Too good to be true

THINK BEFORE YOU CLICK!

PROTECT YOURSELF FROM PHISHING

Don't share your personal information online!
